## Essential Understanding: Learning The Basics of Photoshop and COLOR!

Photoshop is a digital image creation and editing program. Photoshop is an industry standard program. What does this mean? It means that professionals use this program to create graphics. You will be learning the basics of how to use Photoshop. You will be placed in a level group of beginner, intermediate or advanced. Each level will be working a similar assignment with varying levels of difficulty. You will be given a “beginning” task that you must complete correctly before moving on to the next task or assignment. You will be required to complete tasks, tutorials, step-by-step assessments and other skill related work to show mastery of the subject matter.

The unexamined life is not worth living.

Digitally Painted Selfie

# Please read carefully

Paying attention during a lesson = You are looking at the teacher, you are quiet, you are not distracted, talking, looking at or touching a computer or other device. You raise your hand with any questions or comments. ANY behavior not following this outline will NOT receive points for a lesson. \* To receive points have me sign your Study guide directly after the lesson.

Please use your time wisely - You have a lot to do in a short amount of time. Choose what you want to do and when you want to do it. YOU MUST be working at all times to receive an A. You will have a mere three weeks to complete everything!

There are two digital assignments in photoshop (animated sandwich & color gradation) and two possible projects (a color wheel and the digital selfie). The color wheel can be digital or painted- The digital selfie MUST be in Photoshop (unless you had my class already - you may choose between three choices, see me for choices).
