(Zoom Meeting ID: 4972414613 Passcode: Bernales)

"I am here for a purpose and that purpose is to grow into a mountain, not to shrink to a grain of sand. Henceforth will I apply ALL my efforts to become the highest mountain of all and I will strain my potential until it cries for mercy." --- Og Mandino

## Essential Understanding:

$\checkmark$ Functions are single-valued mappings from one set- the domain of the function - to another-its range.
$\checkmark$ Functions apply to a wide range of situations. They do not have to be described by any specific expressions or follow a regular pattern. They apply to cases other than those of "continuous variation." For example, sequences are functions.
$\checkmark$ Functions can be represented in various ways, including through algebraic means (e.g., equations), graphs, word descriptions, and tables.

## Overview:

Welcome to Algebra 1! In middle school math, you may have worked on relationships between two quantities that could be graphed with a straight line. In this lesson, you will explore nonlinear functions and learn how to describe a function completely. You will observe the shapes and behaviors of several different nonlinear functions. Also, you will learn to share your mathematical knowledge with a study team as you work together to solve problems.

## Guiding Question:

As you work through this chapter, ask yourself: Can I identify important quantities in situations and describe their relationships using graphs?

## Lessons:

Content Lesson Themes
$\qquad$ Investigating the Growth of Patterns
$\qquad$ Investigating the Graphs of Quadratic Functions
$\qquad$ Describing a Graph
$\qquad$ Cube Root and Absolute Value Functions
$\qquad$ Function Machines and Functions
$\qquad$ Domain and Range

|  |
| :--- |
| 9/24-9/25: |
| _1) Class Orientation: |

- Getting to know each other
- Class Expectations (virtual and in-person)
- Class Routines (warm-up, exit ticket, individual work, etc.)
- Study Guide
- CPM e-book and other resources
- Materials needed during class
- Collaborative Learning Expectations
- Productive and Respectful Talk
- Grading System
- Tips for Success: What you need to survive and thrive in high school math
- ETC...ETC...

## 9/27-9/28

_2) Continuation of class orientation
Get-It-Together-Activities; mobile puzzles

8/31-9/4:

## Learning Objectives:

$\checkmark$ Recall multiple representations of a linear function and various composite functions with my team.
$\checkmark$ Collect and analyze data with tables and graphs.
$\checkmark$ Interpret different mathematical relationships (direct, inverse, joint, exponential)

1) Group Activity (1.1.1): How can I work with my team to figure out? (20 minutes*)
$\qquad$ Problems: 1-1, 1-2, 1-3
__ 2) Individual Work (1.1.1): (20 minutes**)
$\qquad$ Problems: 1-4 to 1-8
> Due Date: Wed, 9/2 (for Monday/ Thursday classes)
Thurs, 9/3 (for Tuesday/Friday classes)
__ 3) Group Activity (1.1.2): How does it grow? (20 minutes)
$\qquad$ Problems: 1-9 to 1-12
___4) Individual Work (1.1.2): (20 minutes**)
$\qquad$ Lesson Notes: Families of Functions
$\qquad$ Problems: 1-13 to 1-22 (pick two questions/letters per problem only)
> Due Date: Tues, 9/8 (for Monday/ Thursday classes)
Tues, 9/8 (for Tuesday/Friday classes)

## 9/8-9/11:

## Learning Objectives:

$\checkmark$ Describe a parabola, using its intercepts, minima, maxima, vertex, symmetry, and whether it is positively or negatively oriented.
$\checkmark$ Write a summary statements describing the graph of $y=\sqrt{x}$.
$\checkmark$ Generate a list of questions that will facilitate future functions investigations.
$\checkmark$ Define a function.
_5) Group Activity (1.1.3): What do I know about parabola?
Group Activity (1.2.1): How can I describe a graph?
$\qquad$ Problems: 1-23, 1-24, 1-30, 1-31
___6) Individual Work (1.1.3; 1.2.1):
$\qquad$ Problems: 1-25 to 1-29, 1-32, 1-42
> Due Date: Mon, 9/14 (for Monday/ Thursday classes)
Thurs, 9/10 (for Tuesday/Friday classes)
7) Group Activity (1.2.3): What is the function?

Group Activity (1.2.4): Can I predict the output?
$\qquad$ Problems: 1-53 to 1-56; 1-62 to 1-64
___ 8) Individual Work (1.2.3-4):
$\qquad$ Lesson Notes: Functions, Domain and Range
$\qquad$ Problems: 1-57 to 1-61; 1-65; 1-66 to 1-70 (pick two questions to answer for each problem)
> Due Date: Mon, 9/16 (for Monday/ Thursday classes)
Mon, 9/14 (for Tuesday/Friday classes)

9/14-9/17:

## Learning Objective:

$\checkmark$ Describe the domain and range of a given function by examining an equation or graph.
___9) Group Activity (1.2.5): What can go in? What can come out?
$\qquad$ Problems: 1-71 to 1-77
__ 10) Individual Work (1.2.5):
$\qquad$ Problems: 1-78 to 1-82
> Due Date: Mon, 9/21 (for Monday/ Thursday classes)
Thurs, 9/17 (for Tuesday/Friday classes)
$\qquad$ Prepare for a short quiz next class on Chapter 1.

## 9/17-9/21

ASSESSMENT:
$\qquad$ Mini Project: What have I learned? (details will be given in class and uploaded on Schoology)
__Short written quiz on Chapter 1

## Addendum: Class Expectations, Rautines, and Procedures

## Class Expectations

1. Each student is expected to:
a. attend classes everyday, on time and be well-prepared;
b. participate actively during class discussions and activities;
c. show grace and courtesy to everyone;
d. submit neat and well-prepared requirements at the proper time;
e. be responsible in making up for missed lessons, activities or assessments.
2. Adhere to the in-person and virtual class expectations as stipulated in the family handbook and which were discussed during the first community (school wide) meeting.
3. Ask questions when in doubt or when instructions are not clear to you.

## Warm Up/Exit Ticket:

1. Warm Up:

- In your notebook, write/copy your learning objective for the week and do the warm-up on the board or screen.
- If you don't know the answer, write down ANYTHING you know related to the concept.
- Submit work (take a picture/save and upload on the assigned slot in Schoology).
- Completion should take no longer than 10 minutes after class begins.

2. Exit Ticket:

- Completed during the last five minutes of class
- Metacognitive questions (thinking about the way you think), math problem, etc.
- Be sure to answer in complete sentences and show all work needed.
- Submit work (take a picture/save and upload on the assigned slot in Schoology).
- Wait for the teacher to dismiss the class and/or check your exit ticket before you leave the classroom.

## Group Work/Group Activities: (* usually 20-30 minutes during $1^{\text {st }}$ class hour)

- Collaborative Learning Expectations

T together, work to answer questions.
E Explain and give reasons.
A Ask questions and share ideas.
M Members of your team are your first source.
S Smarter together than apart.

- General Team Roles:

Resource Manager - get supplies for your team and make sure that your team cleans up; make sure that everyone has shared all ideas and help the team decide when it needs outside help; call the teacher over for team questions.
Facilitator - get your team started by having someone read the task aloud; check that everyone understands what to work on, make sure that everyone understands your team's answer before you move on.
Recorder/Reporter - make sure that each team member can see the work that the team is discussing; make sure that the team agrees about how to explain your ideas and each person has time to write their answer; make sure that each member of your team is able to share ideas.
Task Manager - make sure that no one talks outside your team or do other stuff other than what is assigned; help your team on task and talking about Math; listen for statement and reasons.

- Productive and Respectful Talk

Be sure to show grace and courtesy during group work always. Please read "Productive and Respectful Talk" hand-out for some start up phrases and suggestions.

- While the group is responsible for holding each other accountable, I will be keeping track of who is participating while observing your work!

Individual Work: (**usually 20 minutes during the $1^{\text {st }}$ class hour and extends to the $2^{\text {nd }}$ class hour as needed)

- At most two components after each class session:
a. Video Lessons: Take notes on procedures not addressed during class

■ Will be posted as a material in Schoology

- Make sure you follow along! Anything on the videos is fair game for assessments
b. Problem Sets: Complete the problems found in the relevant section of the CPM e-book
- Proper responses either have work shown or context for the answer
- Graphs are neatly created with important parts labeled
- If you are struggling, start the question or work and ask me about it during class.
- Late work will NOT be accepted.

## Absence Policy:

- Group Work: You are still responsible for it even if you have an excused absence. See the study guide for the specific problems you need to complete.
- Individual Work: You may receive a one-class extension on the homework assigned the day you were gone.
- Check in with me immediately after school to receive credit for make-up work.

## Tips for Success:

- If you are struggling with the content, see me sooner rather than later.
- Read the "Are you ready for high school Mathematics?" hand-out for some tips on the BASICS (what you need to survive) and BEYOND (what you need to thrive?) for high school math which will be uploaded in Schoology.
- Take advantage of the homework help and parent support on CPM. See links provided in the study guide.
